

February 2000

## Alliance News Lines

---

### Telephone Area Code for the HACCP Alliance Changes

Please update your records to reflect the new area code of 979 for the International HACCP Alliance office. The new 979 area code for Bryan/College Station, Texas, becomes active on February 19, 2000, and it will be mandatory for all long distance calls beginning on August 5, 2000.

### HACCPALLIANCE.ORG Web Site Registered, Active

In January, the HACCP Alliance office was pleased to register a new web site address on the Internet in an effort to simplify and more clearly state the Alliance's web site location. The new address is <http://haccpalliance.org>. Please update your bookmarks on your Internet browser to reflect the new address. The old address is no longer active; therefore, it does not forward visitors to the new address. So please take a moment to manually update your bookmarks. We hope that the new address will be easier for people to remember and readily pass along to interested people for timely information related to HACCP and food safety. If you have any questions or concerns regarding the new site, please contact Misty Pfeiffer at telephone: 979-862-3643 or by e-mail at: [m-pfeiffer@tamu.edu](mailto:m-pfeiffer@tamu.edu)

### HACCP Alliance Booth Travels to San Francisco

The International HACCP Alliance booth will be displayed during the 54th Annual National Meat Association's Convention, February 17-19 in San Francisco, California. The stand-alone display will be located near the convention registration area.

The HACCP Alliance booth is always available for display at events hosted by HACCP Alliance members. The booth can be manned by HACCP Alliance staff or shipped to a location as a stand-alone display. For more information about the HACCP Alliance booth, contact Dr. Kerri B. Harris, at 979-862-3643.

### Videotapes Available from the FSIS Technical Conference on the Sanitation Performance Standard Regulation

Attached is an order form for a set of five videotapes from the FSIS Technical Conference on the Sanitation Performance Standard Regulation held in Omaha, Neb., on December 8-9, 1999. This videotape set is very useful for industry personnel who want to better understand the impact of the sanitation performance standard regulation on processing facilities.
